PROPOSAL

FOR THE

EXTENSION IN SCOPE

OF THE

CLIP MODIFICATION

1 March 1961

As a result of the continued expansion of requirements under RD 45, Task Order CC, the Project Officer has requested that we propose the re-funding of this program, in order to avoid any discontinuity of the work. The additional funds requested are reflected in the attached cost estimate and should be sufficient to cover work to the end of the fiscal year.

Though the general scope of the work remains in the same field of interest, with specific requirements coming directly from the Project Officer, this extension should be considered as an actual increase in the scope of the contract, thereby permitting inclusion of fee.

From our experience to date, we have increased the ratio of manpower effort to purchases to more closely reflect actual contract conditions. It should be further pointed out that actual manpower effort under this program will be dependent upon requirements and will, therefore, vary from month to month. Routine monthly reports together with all results will continue to be furnished.
